

Are you looking for a collaborative agency in Turkey?

We will be more than pleased to be your representative in Turkey.

Upon our client's request, we can help with material acquisition.

With our highly competent team, we can research all systems, types of equipment, spare parts, and all other water and wastewater treatment-related products for our clients. Some of the products are directly manufactured by us. However, we also provide our services of market research and supplying the demanded products from other manufacturers to our valued clients.

As of 2020, this business model was carried out in cooperation with ARITIM.NET. In the purification industry, ARITIM.NET is the only significant marketplace website. Here, you can find many products with product prices and all the needful technical specifications.

RFQ requests from clients are listed on ARITIM.NET

Anyone can bid on the request. And the client can have direct communication.

As an Arbiol group company, it conducts research for us.

Moreover, we provide you with the best offers.

The customer can either directly contact the manufacturer and order the product or we can order on behalf of the customer.

Not only do we have product collection but we also provide warehousing service.

Products arriving at the warehouse are accepted safely and the necessary checks are conducted.

Subsequently, it goes through the packaging process and is sent to the customer.

With our highly professional staff, dedicated work, and confidence, time and money are saved.
